

Custom jewelry manufacturer Since 1872

About us

Chaton Flaczyński

The story begins in 1872. Poland is not on the maps of Europe.

1872

ESTABLISHMENT OF THE COMPANY: SIMON FLACZYŃSKI

In Poland, under the partition and reign of Kaiser William I and Chancellor Otto von Bismarck, a 20-year-old merchant Simon Flaczyński (born 1852 - died 1935) appears in Poznań. The founder of the company was characterized by an exceptional passion for beautiful objects, offering jewelery, watches and sacred items to a tasteful aristocratic clientele.

Simon Flaczyński had four children, of whom two sons Leo (1886-1942) and Witalis continued their work, obtaining in Grodzisk master titles in goldsmithing and watchmaking.

1911

Company registration in Poznań In 1911, the brothers register the company in Poznań. They open stores in Poznań, Berlin, Świecie, Mława and Warsaw. They produce pocket watches with Swiss movements in silver and gold cases of their own production.

1929

In 1929, Witalis Flaczyński obtains a patent in Warsaw for a hairdressing and cosmetic device.

1939-45

WORLD WAR II AND THE TIMES AFTER IT

During World War II, the company was almost completely destroyed. Both brothers were murdered by the Germans. The company was reborn in 1945, led by Kazimierz Flaczyński, his son Leo, who was forced by the communists to run only a watchmaker's shop.

1946-89

The activity of Adam and Barbara Flaczyński. In 1970, the company was taken over by Adam Lech Flaczyński and Barbara Flaczyńska, masters of goldsmithing and watchmaking. 1972 One hundred years after the company was founded by Simon Flaczyński, his great-grandson Adam Lech Flaczyński and his wife Barbara Flaczyńska register at the Poznań Assay Office the manufacturer's personal graphic sign ABF. 1976 Adam and Barbara Flaczyński develop an innovative method of vacuum casting gold and silver. In 1989, they registered the original name of the company CHATON (from the French for "cans"), a temin used by Simon Flaczyński and his sons to denote the setting of rubies in watch movements. In jewelry, it is a special setting of diamonds designed to optically enlarge the diamond and enhance the brilliance of the stone

90'S

In 1990, the Chaton company begins the production of gold and silver chains, becoming at the same time one of the first Polish companies capable of producing diamond chains in 40 basic models and 20 modifications.

XXI CENTURY

1994, the name CHATON is officially protected by a patent in spelling, wording and logo. 2004 Chaton obtains a patent for a chain for a mobile phone. 2010 Chaton obtains the quality mark of the Association of Jewelery Appraisers in Warsaw.

The weight of the products presented on the model applies to 14-carat gold.

The products on the site 74-77 are made of 18-karat gold.

Amber E Gold

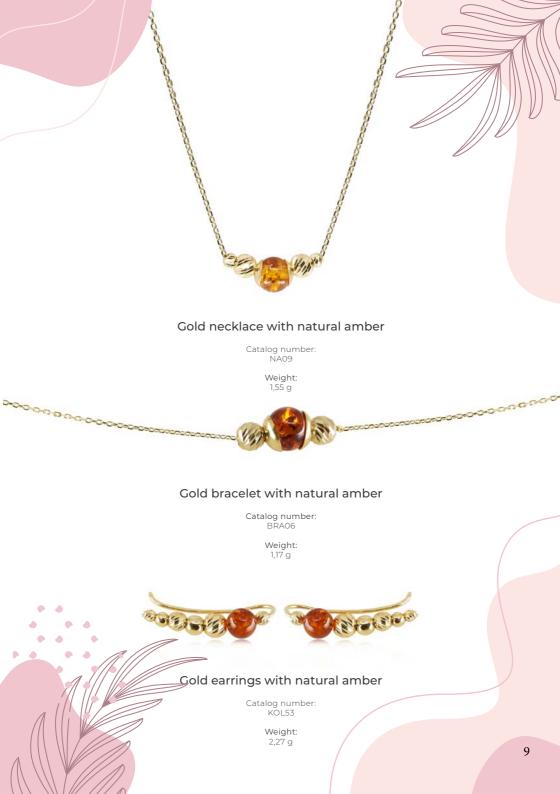

Discover our latest jewelry collections. Amber is one of the most valued materials in jewelry. It owes its popularity primarily to its unique color.

Jewelry made of this precious metal presents an extraordinary phenomenon, and its combination with gold or pearls gives an amazing effect. In addition to its undoubted visual value, this stone also evokes memories of summer sun rays. In our offer you will find unique, eye-catching and beautiful products.

Necklaces, earrings, rings, and bracelets with a contemporary style perfect to pair with all of your seasonal looks. The Amber & Gold collection will give expressiveness and unique character to each styling. All products are designed and made with special attention to detail. This is jewelry you will fall in love with.

Olive Exotic wood

The combination of wood with gold, amber gives a very interesting and original effect. The wood harvested from the olive tree is durable and oily.

In ancient, olive groves were held in special veneration, and the olive branch was a symbol of peace. This gives products made of this type of wood a special dimension and symbolic character.

Our collection includes gold and olive tree. Cross-shaped pendants made of these materials are interesting compositions, and together with their unique forms, they give a beautiful effect. So it is an interesting proposition for a communion gift or any other occasion. We have designed everything in a classic style, with attention to every detail.

Pearls

Pearls remain at the heart of jewelry design. Our pearl collection is a beautiful combination of gold and natural cultured pearls. We used the best quality materials for its creation.

We carefully selected white, black and pink pearls. They have a full shine and have interesting symbolism. They mean honesty, wisdom, purity. They are also a protective amulet. We have created feminine and elegant designs that fit for any occasion and outfit. White pearls subtly emphasize the female beauty. Black pearls will add a mysterious and elegant character to the styling.
